DILAWAR HAMID

MERN STACK DEVELOPER ● REACT.JS | NODE.JS | JAVASCRIPT | API INTEGRATION

0315-4573662 | dilawarhamid446@gmail.com | North Karachi, Pakistan
GitHub: github.com/dilawar-hamid | **Portfolio: dilawar-hamid.github.io/Dilawar-Hamid-Resume**

PROFILE SUMMARY

Frontend-focused developer with growing full-stack MERN expertise, backed by solid experience in React.js, JavaScript, and API integration, plus a backend foundation in PHP, Laravel, and MySQL. Independently built a complete full-stack E-Commerce platform (MongoDB, Express.js, React, Node.js) featuring JWT authentication with bcrypt password hashing, backend-enforced role-based access control, and a transaction-safe order and inventory system. Built and deployed multiple live projects, including a full CRUD-based salon management system.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, React Router, Axios, Formik & Yup, Context API, Responsive/Mobile-first Design

Backend: Node.js, Express.js, PHP, Laravel, MVC Architecture, RESTful APIs

Database: MongoDB, Mongoose (including transactions & atomic operations), MySQL

Authentication & Security: JWT (JSON Web Tokens), bcrypt Password Hashing, Role-Based Access Control (RBAC), Custom Auth Middleware, Environment-based Configuration

Tools & Platforms: Git & GitHub, VS Code, Postman, XAMPP, Vercel, Vite, npm

Core Competencies: CRUD Operations, API Integration, Database Design, Debugging, Team Collaboration

PROJECTS

E-Commerce Web Application — *MongoDB, Express.js, React, Node.js, JWT, Multer*
GitHub: github.com/dilawar-hamid/ecommerce-store-mern

- Built a full-stack e-commerce platform from scratch with complete CRUD for products and categories, including image upload handling via Multer.
- Implemented secure authentication using JWT and bcrypt, with role-based access control enforced at the backend middleware level (not just the UI), protecting all admin-only operations.
- Designed an order and checkout system using MongoDB transactions, with atomic, race-condition-safe stock updates to prevent overselling and server-side price verification to prevent client-side tampering.
- Built order management for both customers (place orders, view order history, cancel pending orders) and admins (view all orders, update order status), with stock automatically restored on cancellation.
- Centralized environment-based configuration for API URLs and secrets, and used Formik and Yup for form validation across all forms.

LUMIÈRE Hair Studio Management System — *React, React Router, Axios, Formik & Yup, MockAPI*
Project: lumiere-hair-studio-management-syst.vercel.app
GitHub: github.com/dilawar-hamid/lumiere-hair-studio-management-system

- Built a full-featured Hair Salon management system with CRUD operations for Services, Staff, and Appointments.
- Implemented client-side routing with React Router and form handling/validation using Formik & Yup.
- Integrated MockAPI for data persistence and used Axios for all API communication.
- Deployed live on Vercel with a fully responsive UI.

Hospital Management System — *PHP, MySQL, HTML, CSS, Bootstrap*
GitHub: github.com/dilawar-hamid

- Developed a web-based hospital management system with patient registration, doctor management, and appointment scheduling.
- Designed a relational database in MySQL and implemented secure, role-based authentication (Admin, Doctor, Staff).
- Built a responsive frontend with HTML, CSS, and Bootstrap alongside full CRUD operations and form validation.

Kernel Travels (Team Project) — *ASP.NET Core MVC, C#, MS SQL Server, Entity Framework, OAuth*

Project: kernal.runasp.net

- Collaborated on a travel booking platform with Admin/Tourist role-based authentication and Google OAuth integration.
- Contributed to SMTP email notifications and AJAX-based search, filtering, and pagination for the admin dashboard.

Elegant Salon (Team Project) — *PHP, Laravel, MySQL, Bootstrap 5, OAuth*

Project: elegantsalon.infinityfree.me

- Collaborated on a salon booking platform with Admin/Customer role-based authentication and Google OAuth integration.
- Contributed to SMTP email notifications and AJAX-based search, filtering, and pagination for the admin dashboard.

Universal Stationery (Team Project) — *HTML5, CSS3, JavaScript, Bootstrap 5*

- Collaborated on a stationery e-commerce platform focused on sustainable and eco-friendly products.
- Contributed to the responsive frontend design and checkout experience.

EDUCATION

Matriculation — BSEK (2023 – 2024)

Second Year Engineering (Intermediate) — BIEK (2024 – 2026) — Completed

Software Engineering Diploma — Aptech (2024 – 2027) — In Progress

LANGUAGES

English: Intermediate Urdu: Fluent
